

How do you want to live with nano in society?

Rider Foley is an assistant professor in the science, technology & society program in the Department of Engineering and Society at the University of Virginia. He is the co-leader of the 'Nano and the City' thematic research cluster for the Center for Nanotechnology in Society at Arizona State University. Rider is also a Research Collaborator with the Sustainability Science Education program out of the Biodesign Institute. His research interests attend to wicked problems by testing solutions at the intersection of society and technology. Rider holds a Ph.D. in sustainability from Arizona State University, and a Master's degree from Harvard University and a Bachelor's degree from University of New Hampshire. Before earning his doctorate, he worked for a decade in environmental services for Triumvirate Environmental Inc.
